

Miro

## **Miro Milk Powder**

“Arab Cultivators El Tanbouli & Co.” company is honored to introduce its product, “Miro Milk Powder”.

We joined the trading industry in 1925 and we started repacking milk powder in 1997. Since then and till today, we have remained keen to provide 100% natural milk in the form of powdered milk, for use as food and healthy nutrition.

We are working in the industry of importing and repacking instant milk powder under our brand name “Miro”. In the beginning of 2014 we launched a new range of products, “Miro Mix”, which are flavored milk drinks (in powder form) with strawberry, banana, chocolate and vanilla biscuits flavors.

## Our Factory

In 1965 we established our dairy products factory and since then, we have continued to develop and improve it so that it would meet international standards. This is why we are using modern methodology and the latest machine technology for packing and manufacturing different ranges of products; to make sure we provide our valuable customers with high quality products and the best prices.

In 1997 we started repacking "Miro Milk Powder" in our factory. This was primarily done by ensuring the presence of an appropriately healthy climate inside the factory, through using different types of air purifiers that kill any fungus and unhealthy bacteria. This was especially applied to the packing rooms, and all to achieve our main aim which is introducing a healthy, fresh product to the Egyptian market. This is also why we were easily awarded the ISO 22000 certificate.

In 2012 we officially began working in our new factory facility in El Sadat City.

## Miro Full Cream Milk Powder

Miro Full Cream is one of our unique products, and it can be used in lots of different ways. Miro has plenty of nutritional benefits as it contains vitamins A and D, both of which are needed for bone health and teeth. They are also quite essential for children to build their bones.
